MidPoint Community Meetup 2025

Connecting Minds, Empowering Identities

May 12 - 14, 2025 ● Bratislava, Slovakia

Evolveum is organizing an in-person meeting featuring a comprehensive agenda with interactive workshops and sessions on identity governance & administration led by Evolveum's seasoned professionals, and engaging community discussions.

Attending This Event Will Enable You To:

- **Enhance Your Skills:** Whether you're a beginner or an advanced user, the workshops and talks offer two streams: one for newcomers and another for those deepening their expertise.
- **Explore Advanced Features:** Gain insights into cutting-edge midPoint functionalities like role mining and entitlement management. Connector development will also be discussed.
- **Optimize Your Deployments:** Learn how to efficiently perform a simplified midPoint deployment and improve deployment performance.
- **Facilitate Compliance:** Understand how midPoint can help with regulatory compliance and streamlining identity governance processes.
- **Stay Ahead:** You will be introduced to upcoming features and midPoint's roadmap to prepare for future trends and updates.

Who Should Attend:

We invite CIOs, CTOs, integration and security specialists, IGA engineers, compliance professionals, and IT operations teams with responsibilities or involvement in the following areas:

- Aligning IGA with organizational goals
- Improving solution architecture
- Ensure seamless integrations
- Optimizing identity workflows
- Managing daily IGA operations
- Aligning with regulatory standards

Topics You Can Look Forward To:

- Cloud Resources with Rate Limitations
- Feature Preview: First Look
- First Steps Methodology
- How to Add Custom Attributes
- How to Manage Entitlements via MidPoint's User Interface
- IGA - Who Has Access to What and Why?
- The Latest Features in Connector Development
- MidPoint's Roadmap
- Performance Tuning of Deployments
- Regulatory Compliance with MidPoint
- Role Mining
- Thinking in MidPoint
- Use the Studio Luke

The agenda content is in progress and is subject to change.

Evolveum

Agenda: May 12 (Monday)

Workshops
9AM -12PM

Interactive Workshops Led by Evolveum Experts

First Steps Methodology

Learn how to perform a simplified midPoint deployment. Ivan will guide you through quick steps to deploy simple midPoint configurations, including connecting the first resources.

Ivan Noris
Evolveum's Expert Identity Engineer

Role Mining

Explore role mining, analyze access patterns, and transform data into optimal business roles using midPoint's capabilities.

Tadeáš Chrapovič
Evolveum's Java Developer

Martin Bielik
Evolveum's AI/ML Developer

Sessions

Stream 1: Introduction to IGA MidPoint

Thinking in MidPoint

Slávek and Pavol will show you how to work with midPoint, not against it. Understanding the concepts makes the difference!

Pavol Mederly
Evolveum's Senior Software Developer

Slávek Licehammer
Evolveum's Head of Engineering

Stream 2: Advanced MidPoint Users

Performance Tuning of Deployments

Tony and Pavol will show you the usual performance pitfalls in deployments, how to avoid them, and discuss performance aspects of MidPoint 4.9.1.

Tony Tkáčik
Evolveum's Backend Development Leader

Pavol Mederly
Evolveum's Senior Software Developer

Lunch
1PM - 2.30PM

Lunch break

Panel Discussions

To be announced

Break

Short break

Sessions

Stream 1

How to Add Custom Attributes

Learn how to easily add custom attributes for different types in midPoint. We'll only be working in the GUI, so we don't need to know the structures of stored schemas.

Lukáš Škublík
Evolveum's Frontend Development Leader

Stream 2

The Latest Features in Connector Development

Explore the latest connector framework features in midPoint, including new connID contributions, examples, and benefits for enhanced functionality.

Matúš Macík
Evolveum's Senior Identity Engineer

The agenda content is in progress and is subject to change.

Evolveum

Agenda: May 13 (Tuesday)

Sessions

Stream 1: Introduction to IGA MidPoint

How to Manage Entitlements via MidPoint's User Interface

Ivan will demonstrate how midPoint can be configured for managing entitlements using only midPoint's user interface. The entitlements will be represented by LDAP groups and their memberships.

Ivan Noris
Evolveum's Expert Identity Engineer

Stream 2: Advanced MidPoint Users

Use the Studio Luke

Viliam will show you how to make your life easier with a few tricks using midPoint Studio when working on midPoint deployments in different phases.

Viliam Repáň
Evolveum's Senior Java Developer

Panel Discussions

Lunch
1PM - 2.30PM

Lunch break

Sessions

Stream 1

IGA - Who Has Access to What and Why?

Learn how midPoint can help you answer tough questions from auditors and management.

Martin Špánik
Evolveum's Senior Identity Engineer

Regulatory Compliance with MidPoint

Radovan Semančník
Evolveum's Co-Founder & Head of Compliance

Peter Pištek
Auditor at Securedo

Cloud Resources with Rate Limitations

Pavol will show you how to deal with resources that are tough to access because of their low throughput, slow responses, high price, or all these things combined.

Pavol Mederly
Evolveum's Senior Software Developer

Stream 2

Feature Preview: First Look

Join us for an exclusive sneak peek at innovative new features currently in development. Discover early prototypes and ideas that are still 'cooking' behind the scenes!

Patrik Maliňák
Evolveum's User Experience Designer

Agenda: May 14 (Wednesday)

Sessions

MidPoint's Roadmap

Katarína will shed light on what her team of developers is working on for midPoint 4.10 and what new features you can expect in the future.

Katarina Bolemant
Evolveum's Chief Product Officer

Evolveum

Speakers

Martin Bielik
Evolveum's AI/ML Developer

Martin is a skilled software and AI/ML developer of midPoint at Evolveum. He is currently a key member of the team working on advanced features, such as role mining, outlier detection, and other cutting-edge AI functionalities that will shape midPoint's future capabilities.

Katarína Bolemant
Evolveum's Chief Product Officer

Katarína Bolemant is one of the founding members of Evolveum. Katarína has been a crucial part of midPoint's development ever since the company's creation. Currently, she is the Chief Product Officer, and her team focuses on the continuous improvement of midPoint.

Tadeáš Chrapovič
Evolveum's Java Developer

Tadeáš is a Java developer at Evolveum. His expertise includes Java, software development, identity management, and data analytics. He is currently focused on researching how AI can enhance the role management functionality in midPoint.

Slávek Licehammer
Evolveum's Head of Engineering

With more than 10 years of experience in identity management and governance, Slávek combines his profound knowledge and skills to efficiently solve complex questions and find the best solutions. Slávek enjoys being a part of the IAM community and frequently participates in community initiatives and meetings.

Matúš Macík
Evolveum's Senior Identity Engineer

As an identity management and software engineer, Matúš specializes in integrating systems with IAM. He has successfully delivered numerous IAM deployments, contributed to multiple IdM connector projects, and leads training sessions in Evolveum's course portfolio.

Patrik Maliňák
User Experience Designer

Patrik is a UX designer at Evolveum and is dedicated to enhancing midPoint by prioritizing users' needs. He focuses on understanding user challenges and developing solutions that simplify complex tasks, improve efficiency, and make the UI both user-friendly and visually appealing.

The agenda content is in progress and is subject to change.

Evolveum

Pavol Mederly
Evolveum's Senior Software Developer

Pavol has over 30 years of experience in IT. He has participated in several roles in higher education organizations. He is currently a software developer at Evolveum, where he was one of the first team members and leading figures in the development of midPoint.

Ivan Noris
Evolveum's Expert Identity Engineer

Specializing in identity management and governance, Ivan leverages 20+ years of experience through analysis, design, midPoint customization, support, and consultations at Evolveum. Ivan is also one of the authors and trainers of Evolveum's training courses.

Peter Pištek
Auditor at Securedo

Peter Pištek is an independent cybersecurity auditor and researcher with over 15 years of experience, specializing in forensic analysis, phishing, and anomaly detection in high-speed computer networks.

Viliam Repáň
Evolveum's Senior Java Developer

Viliam is a senior Java developer at Evolveum with more than 10 years of experience in identity management. He has a proven track record of working on multiple deployments of various sizes and addressing different challenges when it comes to software integration.

Radovan Semančík
Evolveum's Co-Founder and Software Architect

Radovan is a co-founder and software architect at Evolveum. He began pioneering early identity management deployments in Europe in the 2000s. With over 30 years of experience in the field, he channels his expertise into midPoint's development, with a focus on compliance.

Lukáš Škublík
Evolveum's Frontend Development Leader

Lukáš has been working at Evolveum for over 8 years. In addition to leading Evolveum's frontend team, he has recently been involved in the development of the resource wizard and has been improving the graphical interfaces of the midPoint application and flexible authentication.

The agenda content is in progress and is subject to change.

Evolveum

Martin Špánik

Evolveum's Senior Identity Engineer

Martin has 20+ years of IT experience, specializing in data encryption, database monitoring, disaster recovery, IdM, and PKI. A skilled IS auditor, he has deep knowledge of security risks and environments. Currently, he is a senior identity engineer at Evolveum.

Tony Tkáčik

Evolveum's Backend Technical Leader and Developer

Tony has over 11 years of experience with OSS development and governance. Previously, he developed high-performance model-driven software for provisioning network configurations. Currently, he focuses on optimizing midPoint's performance across several components.
